

Daedalus and Icarus

Teegan and Caden

Icarus Icarus how much we miss you
You were so loving and caring
Making people smile for ear to ear
Always having fun with my creations
I wanted to do more with you
Oh Icarus Icarus how much I miss you

Our story is real; People think that it's a myth
Daedalus is my name also artful craftsman
Inventing tools is my favorite thing
The axe, saw, and the drill are my workings
I am very proud of my famous sword
Creations don't always work though; I'll tell you why

Working and working; making a sculpture
Hercules thought that this was real
Attacking it like an enemy
I know I have deadly jealousy
A habit I have is still envying others work
Running from King Minos for my crimes

People were scared of the minotaur
Half man, half bull; terrifying
A perfect opportunity for King Minos
He was done with Daedalus and threw him in
In the labyrinth which had a minotaur in it

Suck, suck in the labyrinth
Daedalus and Icarus needed to escape
They started making wings
The wings were for them to fly out
So they started collecting and gathering feathers
Then they were done with the wings

Daedalus warned his son
Saying not to fly too close to the sun
Also don't fly too close to the sea
That was easy to remember
Icarus didn't listen; He went too close to the sun
Icarus Icarus, oh how we had to find you
